ASSEMBLY INSTRUCTION

PRECAUTION

Read all instructions carefully and examine the visuals before proceeding with installation.

SECURITY LOCK INSTALLATION

STEP 1:
Place the dials to the preset opening combination: 0-0-0-0.

STEP 2:
Insert a screwdriver into the reset button and turn it 90° clockwise.

STEP 3:
Set your new 4-digit secret code combination.

STEP 4:
Insert the screwdriver into the reset button and turn it 90° counterclockwise.

STEP 5:
Pinch the push button between your index finger and thumb, and insert the head into the safety notch.

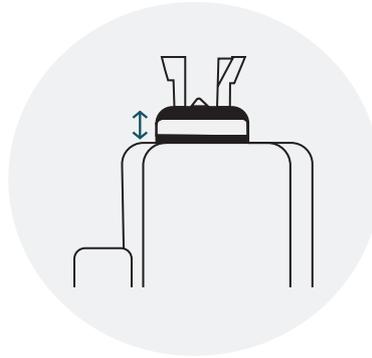

STEP 6:
The cable head automatically fits into your device's notch.
- WEDGE®
- NANO®
- T-LOCK®

The different notches

For the WEDGE® notch: press the button; the two black lines should be visible.

For the NANO® notch: press the button and push the lock inwards to the position of the first black line.

For the T-LOCK® notch: press the button and push the lock until only the last black line is visible.

STEP 7:

Release the button and mix the numbers of the secret code to lock the security cable. The lock is now activated.
