

MAGNET FOR LOCKABLE SIGNAL-BLOCKING POUCH

Put away your phone. Free up your concentration.

This solution complies with the government directive 'MOBILE PHONES DURING BREAKS' in schools.

Our innovative cover effectively blocks all waves, rendering the smartphone unusable as soon as it is inserted. Students keep their phones with them, but cannot use them during lessons. This practical device promotes responsibility and helps reduce distractions in the classroom.

UNLOCKING MAGNET

Ref. 001396

**SILVER THREAD INNER LINING/
FARADAY CAGE**
Blocking of all electromagnetic waves

SECURE MAGNETIC LOCKING SYSTEM

STRONG AND DURABLE NEOPRENE MATERIAL

TRANSPARENT LABEL HOLDER
for identification/personalisation of the pouch

How does the MOBILIS[®] signal-blocking pouch work?

1 *Put the phone in the pouch*
The pupil places their phone in the pouch under the supervision of a supervisor or teacher.

2 *Locking the pouch*
He presses the hexagonal button to lock the pouch.

3 *Unlocking the pouch*
At the end of the exam or the day, the student goes to the magnetic base. They place the circle on the magnetic base, then press the hexagonal button again to unlock the pocket.

Magnetic base fixing system

1 Unscrew the base of the magnet.

2 Secure with screws (not supplied), then close the base.

3 Optional: reinforce the fastening by using three additional screws on the outside.

Although we present an example in an educational setting, these pouches can be used in many other contexts: professional events, offices, courtrooms, public transport, sensitive locations, travel, as well as cultural or sporting activities.
