ASSEMBLY INSTRUCTIONS

STEP 1

Make sure you have your compatible handstrap case equipped with a Pogo Energia Mobile.

STEP 2

Position the lower part of the handle into the small side holes in the case. First insert the small strap into the upper hole (toward the inside of the shell), then pull it out through the lower hole (toward the outside).

STEP 3

Next, thread the entire strap through the small loop. The bottom part is now attached to the case.

STEP 4

To secure the top section, slide the Velcro strip into the top slot of the case.

STEP 5

Adjust the tightness using the Velcro closure. You can slide the stylus into the loop provided (stylus not included).

STEP 6

Place the device in the case by aligning the USB-C port on the Pogo Energia Mobile with the one on the device. Your device is now ready to use.
