MOBILIS[®]

CARE & CARRY

OUR COMMITMENTS

DESIGNING ECO-FRIENDLY PRODUCTS IN FRANCE

FOR 30 YEARS, MOBILIS® HAS SUPPORTED THE EDUCATION SECTOR!

Our industrial expertise allows us to oversee every stage: design, development, manufacturing, and customization. Deeply invested in our children's future, MOBILIS® is dedicated to **reducing its environmental and social impact** throughout the product lifecycle and ensuring long-lasting durability.

Whether it's in a backpack or classroom, our goal is to **extend the life of your equipment and make it easier to use, so learning is more fun and creative!**

VIERZON FACTORY, FRANCE (18)

ANNECY FACTORY, FRANCE (74)

They Trust Us

MATERIALS SUSTAINABLE

We carefully select materials sourced from recycling programs.

REPAIRABLE & REUSABLE PRODUCTS

We ensure our products are built to last and manage their end-of-life responsibly.

TAILOR-MADE CREATIONS

Our in-house design team allows us to create custom products just for you.

2 Factories in France

We're the only company in the industry with our own factories in France.

Let Us Handle Your Project!

We customize our products to fit your needs: label holders, carrying systems, sizes, colors, logos... Our design team creates products tailored just for you!

SCREEN PROTECTOR.

KEEP YOUR SCREEN SAFE FROM DROPS AND BREAKS.

ACTIVE STYLUS.

The perfect tool for learning, writing, and creating.

PROTECTIVE SCREENS

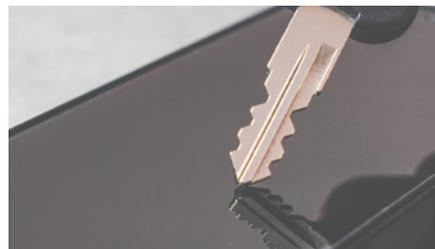

Keep your smartphone or tablet safe from everyday wear and tear—screen protectors are a must-have accessory!

- **Unbreakable and flexible** top-rated shock protection (IK06)
- **Antimicrobial** : eliminates 99% of germs in under 24 hours*
- **Oleophobic** : repels water, oil, and dirt

WON'T BREAK! Perfect for younger users, it prevents accidents caused by shattered tempered glass.

Available for: iPad 11th gen, Galaxy Tab A11+, and many other models.

WHY USE A SCREEN PROTECTOR?

91% of users have already broken a screen!

On average, screen repairs cost:

- 500 € for a laptop
- 200 € for a tablet
- 100 € for a smartphone

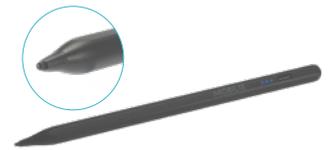

Protecting your device at all times extends its lifespan and lowers its total cost of ownership!

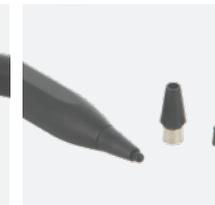

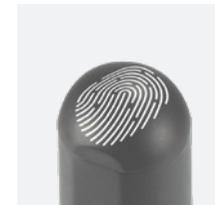

ACCESSOIRES

Universal active stylus for tablets

With this stylus, you can write, draw, and browse smoothly, with exceptional writing sensitivity. Its fine tip allows for precise and continuous movements.

- **10 hours of continuous use** Auto sleep after 15 minutes, recharges via USB-C.
- **Works with iOS and Android** - Browse, write, draw, and take notes with ease
- **Fine Tip** (1.45 mm) delivers accuracy, sensitivity, and smooth performance (replaceable)
- **Touch On/Off Buttons** conveniently located at the end of the stylus to power it on or off

Also available in 100W

DISCOVER THE CHARGING SOLUTION THAT FITS YOUR NEEDS.

A complete range from 10W to 100W

Power Delivery / PPS (Programmable Power Supply): For USB-C charging ports.

These technologies speed up and optimize charging by adjusting the power delivered to match your device. The wall charger delivers just the right amount of power for your smartphone or tablet, making charging more efficient and faster while also extending battery life over time.

GaN (Gallium Nitride) Component:

This component allows for electronic systems that are both more efficient and compact, helping to reduce energy loss. Chargers featuring GaN technology use less power and are smaller and lighter than traditional adapters.

LOCKABLE ANTI-WAVE POUCH.

Put Your Phone Away. Unlock Your Focus.

ACCESSOIRES

Wave-Blocking Pouch

This smart pouch completely blocks all wireless signals, making any smartphone unusable once it's inside. Students keep their phones with them, but can't use them during class. This handy solution helps build responsibility and cuts down on classroom distractions.

• Silver Fiber Shield / Electromagnetic Protection

Lined with conductive fabric (silver thread) to fully stop radio signals—calls, WiFi, Bluetooth—so messages and notifications are blocked all day.

• Secure Magnetic Lock

Special magnetic locking system, inspired by security tags, that can't be opened from inside the school. Only an external plate or magnet, held by staff or at the exit, can unlock it.

• Strength and Durability

Durable material (ballistic nylon or reinforced polyester) to protect your phone from drops and bumps, with reinforced stitching and rigid edges to prevent crushing.

Compact and lightweight

Magnetic unlock

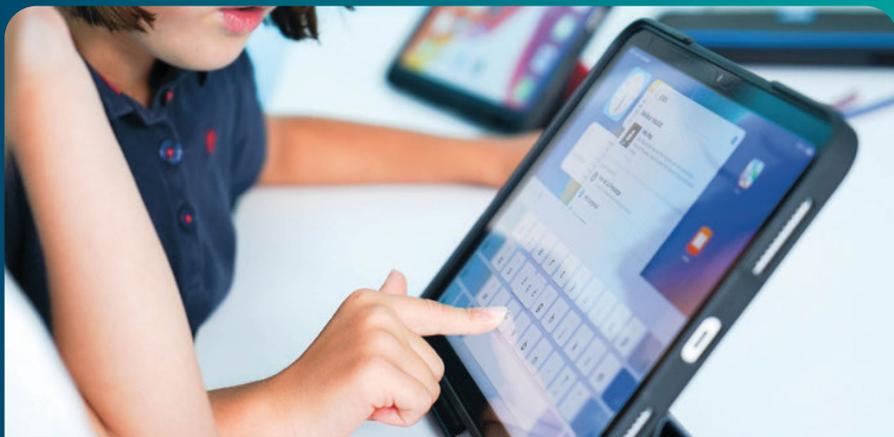

PRODUCT MEETS FRENCH REGULATIONS

Following the government announcement and a protocol already tested in nearly 180 middle schools, banning cell phones is now seen as a way to boost focus and improve the school environment. The anti-wave pouch is designed to support this initiative, ensuring peace of mind and respect for school rules.
